

## APPENDIX 16: SKO GENRE CLASSIFICATION 31.12.2018

## 1. INTRODUCTION

This appendix contains the SKO genre classification used for television programmes. The Dutch TAM works with a one dimensional genre classification to categorise the broadcasted content of the Dutch television channels.

## **MAIN CATEGORIES**

The classification consists of 8 main categories (level 1):

Level 1		Level 2	Level 3	Level 4
1.	Non fiction	2	3	12
2.	Fiction	2	4	22
3.	Entertainment	4	2	-
4.	Sport	2	4	-
5.	Music & dance	2	9	-
6.	Children (0 - 12 yrs)	4	2	4
7.	Advertising	-	3	-
8.	Other/unknown	-	5	-
Tot	al	16	32	38

In total, there are 70 codes available for the classification of the television programmes.

This classification sometimes changes. To avoid trend breaks, the structure of the classification has not been changed. Compared to the previous SKO genre classification, the main changes are the following:

- The number of categories has been reduced to 70.
- The main category Information and Education has been renamed as Non fiction.
- The categories at level 3 and 4 have been reduced. As a consequence, very specific categories are now classified as "other".

In particular, the most detailed subcategories at the third level have been reduced. For example, within the main category Fiction, several subcategories have been grouped together: the five subcategories in the previous classification (Police/detective/crime, Action/thriller, Science Fiction, Western, Horror) have all been grouped together within the subcategory Suspense.

Another example consists of the television game shows within the main category Entertainment: in the newest classification, the subcategories Big game shows and General knowledge quizzes have been apportioned to the already existing subcategory: Games & quizzes.
